

01:Text and Images

Introduction

In our last class we learned about Text formatting and Images in HTML. Let's put our knowledge into practice. Today you will add more content, features and images to your solar system website.

Description

Explore the text formatting properties like font-size, font-family, text-align, color. You can use background-color property to give background-color to text or to the whole body.

Planets are made up of different atmospheres, minerals, and surfaces giving them beautiful colour combinations. Use the img tag to put an image for each planet.

Steps to follow

1. Click on [Project Link](#).
2. Login to your codepen account(if not logged in already).
3. Open your assignment link of class 10 and continue working on it.
4. After you complete the coding, save it and rename ACA011-SolarSystem.
5. Then click on Share, copy the link and paste it into the Project Submission area.

Hints

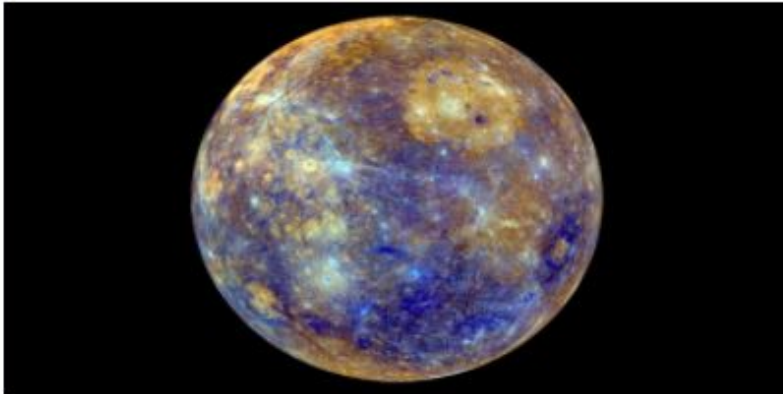

```
<html>
  <head>
  </head>

  <body style = "font-family:courier;">
    <h1 style="text-align:center ;color :purple">Solar System</h1>
    <h2 style="color:blue; background-color:yellow"> Mercury </h2>
    
    <p> The smallest planet in our solar system and nearest to the Sun </p>
    <p style="font-size:120%; background-color:lightyellow;"> Fun facts </p>
    <p> Not only is Mercury the smallest planet, it is also shrinking! </p>
    <h2 style="color:red; background-color:cyan"> Venus </h2>
    <h2 style="color:green;"> Earth </h2>
    <h2> Mars </h2>
```

Sample Website

Solar System

Mercury

The smallest planet in our solar system and nearest to the Sun

Fun facts

Not only is Mercury the smallest planet, it is also shrinking!

Venus

Earth

To get the link of an image use the below :-

1. Download an image of your choice from google.
2. Open <https://postimages.org/>
3. Click on Choose Image.

Post your images here

Get permanent links for Facebook, Twitter, message boards and blogs

Do not resize my image ▼

No expiration ▼

4. Select the image from your local drive and click open.
5. Copy the Direct link and use it in your Codepen as the src of the image.
